

In April 2007, I took what I thought to be the ambitious challenge of holding a Fundraising event for my son George whom is 9 years old and suffers from Juvenile Arthritis.

With the enormous support of friends, colleagues and organisations we managed to raise in excess of \$80,000 as a direct result of our success, research is now underway to try and find a cure for this debilitating disease.

I was overwhelmed to have such unique pieces of memorabilia from Dawn to be a part of our Fundraiser. The two collages meant more to me as they were not only a piece of history but they were to help raise funds for my son's disease.

The collages were auctioned separately on the night of the Fundraiser and we raised a total of \$4500 from these amazing pieces.

The support that I received from Dawn was very humbling not only did her collages make history at our Fundraiser but the fact that she wrote to me personally will never be forgotten.

These collages were the talk of our event, guests wanted to know where I got my hands on such amazing pieces. These collages sell themselves they were so well presented, and having raised so much money was overwhelming.

Dawn I Thank you from the bottom of my heart for your kind words, your support and most important allowing my family and our guests to share in such unique memorabilia.

All my love

Mary Kranitis
